

Technology

Counsel for the rapidly evolving technology sector

Nelson Mullins' attorneys working in technology law bring a combination of technical knowledge, business acumen and transactional experience. Our holistic approach to technology law can help

- technology startups, growing tech companies and investors structure financing agreements and deals, including angel and private equity deals.
- companies in the research-and-development phase that are looking to secure intellectual property rights.
- purchasers of technology products or services seeking to negotiate licensing, cloud, outsourcing, or other agreements.
- companies seeking to protect their data from cyber threats and leveraging technology for their business operations, including electronic contracting, blockchain, IoT and more.

A holistic approach that combines multiple legal disciplines

Technology law exists at the intersection of multiple disciplines, requiring an integrated of clients' needs. Nelson Mullins' work in technology includes transactional representation for the acquisition and disposition of technology products, as well as intellectual property work and negotiations with suppliers and purchases of technology products. Our attorneys bring balanced perspectives to issues ranging from contracts and corporate governance to M&A and litigation.

Interdisciplinary work addressing the many issues facing tech companies
